

**REVOLUTIONIZING THE COMPOSITE METAL PANEL INDUSTRY!**

## UCPS 1000 SERIES

**THE HYBRID RAIN SCREEN AND WET SEAL COMPOSITE METAL PANEL EXTRUSION ATTACHMENT SYSTEM THAT IS "THE SOLUTION TO CONTROL YOUR COSTS, AND YOUR SCHEDULE!"**

As the industry leader, innovation and attention to detail is a priority! Therefore, all UCPS products have been custom and meticulously designed by industry leading professionals with over 100 years of combined commercial architectural sheet metal and metal wall panel experience. Thus creating the Universal Composite Panel System (UCPS) 1000 Series, now known as the industry's highest rated and strongest composite metal panel extrusion and attachment system on the market, that is "the solution to control your costs and your schedule".

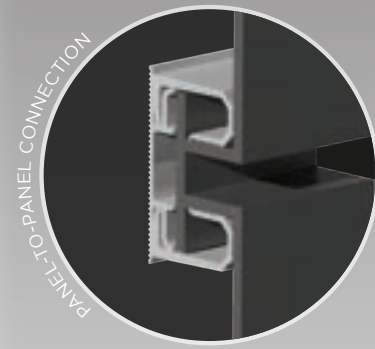

The UCPS 1000 Series brings a unique set of features not yet seen in the industry previously, as it is a hybrid attachment system that can be installed as both wet seal and rainscreen composite metal panel system attachments and design. It's innovative design also uniquely incorporates a first-of-its-kind concealed drainage system. Additionally, installer safety was considered with a concealed fastener design, keeping the hands of the fabricators and installers safe from unseen fasteners.

The UCPS 1000 series is a favorite of fabricators, installers, architects, and owners alike, receiving the industry's best V1 rating in the AAMA 508 testing and a W1 rating in the AAMA 509 testing, user-friendly installation, and a concealed drainage system that has no effect on the beautiful and exceptional aesthetics of your composite metal wall panel system.

### UNIQUE FEATURES AND BENEFITS

- Universal hybrid design for both rainscreen and wet seal installations and applications requiring no change in fabrication of your panels, or additional time to prepare either system.
- State-of-the-art internal weep / drainage system.
- The Universal hybrid design of the UCPS system means you only need to stock (6) profiles for both rainscreen and wet seal wall systems, providing the benefit of exceptionally low inventory to provide either system application.
- UCPS's internal weep system keeps unsightly holes out of your panel system design and aesthetics, maintaining a clean and stream lined look of ACM while providing the necessary drainage to complete your system assembly, further supporting your need to keep your investment dry and your aesthetics clean and beautiful.
- Awarded the industry's best V1 rating in the AAMA 508 testing and a W1 rating in the AAMA 509 testing.
- Strong tubular design that keeps fasteners and rivets encapsulated, protecting the hands of fabricators and installers alike.
